MONDAY MORN'G, JONE 7, 1858.

IF The circulation of "THE NEWS" is double that of any paper in the State out of the city of Providence. At the office of pub-Ecation every facility is had for the execution of all kinds of Book & Job Printing with nextness and despatch.

The debate in the Senate upon the insults of British armed vessels upon our commercial marine has given the members of the Senate a fine opportunity to air their patriotism, and to show the country what demagogues there are, even in the Senate. There is no doubt but that the British cruisers have violated the law of nations, in as tunning to visit American vessels without the consent of their commanders. But we should not forget the circumstances under which these things have been done. Bugland has a very laudable desire to suppresthe African slave trade- a large party in the United States secretly consives at its existence. This is so well understood that great members of Spanish and Portuguese vessels engaged in this nefacious traffic fraudulently hoist the United States flag for the purpose of obtaining an immunity from arrest and detection, to which, they would he more liable, were they to assume their true national character.

This fact being every where patent, am the British government having captured a large number of Spanish and Portugues slavers sailing under the American Flag, it fraud of the rights of American commerce, the British government cruisers have visited suspiciona vessela for the purpose of ascertaining their true national character. This is the offence for which Buchanan and Cass are trying to involve us in a war with England; and for fear that the administration will make some capital out of the matter Dauglass, Seward and Wilson, have united in famoing up the strife.

Our lathers denounced the slave trade as piracy. Their judgment was just. It is our duty to suppress it even if in so doing we subject our commerce to some little in convenience. There is little of good in this world unmixed with evil, and it is better that our commerce should be subjected to some slight inconvenience, than that American nationality should be made a shield to protect foreign pirates.

It is true, we suppose, that if a British cruiser visits vessels sailing under the American flag, that they do it at their peril, if she is a slaver, that is a pirate, they are justified, if not, though they may have reason to suppose that she is such, they violate the law of nations, precisely, as a private citizen, who arrests a person charged with the crime of burglary, no matter under what circumstances of suspicion, stands justidied or condemned, by his ability to convict the accused of the offence.

England clearly has no right to visit American vessels engaged in lawful commerce under any pretense whatever, but if she should do this by mistaking the true character of the vessel in the pursuit of a design to suppress the slave trade, there would be so much of amelioration in the offence, that no honest and well disposed citizen would believe that this would be a cause for going to war.

These are Sommern frogs-we advis Northern Senators to wait a little while, and to ascertain a little more about these matters before they begin to throw stones.

"Then I will keep it a week."

The decree requires some consideration.
It is much milder than was anticipated—
much milder than the translation which

THE FIGHT IN LINN COUNTY, K. T. We have in the correspondence of the St Louis Republican, a detailed account of the condict between a party of pro-slavery men, under "Capt. Hamilton," and a party of free State men under " Capt. Montgomery," at Sydris, Linn Co., K. T. But Eke tle or da. The result appears to have been that ten of the free State men were been that ten of the pro-slavery. This looks more like a slaughter than a fight especially as it is admitted that the shire had been previously disarmed. In justification of the slayers it is alleged that they had previously been driven from their home. by the free State band under Mongamery. Election Prayer Meeting at Newport-

The following article, prepared, it is understood, by the Rev. Dr. Jackson, we copy from the Watchman and Reflector:

LEGISLATIVE UNION PRAYER MEETING, Newpoter, R. L.-Messys, Editors:-For some years our churches have met on Election morning at an early hour for prayer. During the past year a desire was expressed by many that a more public meeting should be bold on that day, and that the members of the General Assembly should be invited to atomic. In consequence of the extensive which of efficient themselves the State the revival of religion throughout the State, the pastors of the Baptist charcaes in this city resolved to hold such a meeting, and as our Executive was a member of a church, and also the Lieutenant Governor, they, without conference with any one, invited them to

Turner, of Warren, who spake of his recent conversion with great inter-st, and then invited several members of the Assembly and others, to express their religious feelings. On Thursday morning, the Hon. Mr. Bennet, a member of the House from Providence, and on Priday morning, Ex-G overnor Hoppin, also of Providence. The several gentlemen hav-ing the arrangement of the services at each and the arrangement of the services it can successive interview, greatly enriched the occasions not only by excellent remarks, but elicited the same devotional exercises from many of their associates in the halts of legislation. The Novallana the Garagner ishtim. His Excellency, the Governor, foculshed at each hour many valuable sug gestions in morals and religion, and less Honer the Lieut. CORRESPONDENCE. Washington, Friday, June 4th. What of the Government?-What is the object of Governments?—The object of European Monarchies is to support, in idleness and luxury, a royal family and a hareditary aristocracy, at the expense of the shed From out her mother's heart, well'd forth in people. Consequently the power of government is lodged in the former to be managed to suit themselves, and so far they seem to have been successful in fully carrying out the object of their respective Covernments. The original object of the United States Government was to protect the people in the mutual and equal enjoyment of life, liberty, and the pursuit of happiness. To this end the government was lodged in the whole people, equally, with power to select officers or agents from among themselves to carry on the functions of government. It was the design that the people should be the principals, the real governors, and their officers mere agents to per form their will, at reasonable salaries, the same as clerks in an extensive business establishment. We will not say that rela tions are now changing, and that the agents are beginning to take the place of their principals, he people, and to become the real governors, (although things look some in that way), but we will say that these agents are becoming extremely delinquent in their respective duties -- particularly carelul of their own interests, and negligent of those of their principals. In the first place, without consulting their employers, they raised their wages from eight dollars per day, actual service, to three thousand dollars per annum, work or play. However, the people did not object to this, but thought it would he a very good arrangement if they would only do their work as it ought to be done. But scarcely had a single thing been done for the country, at the present session when we heard members hinting at an adjournment, stating boldly that their private interests required their attention at home. And now, while we are on the very verge of a war with one of the strongest Powers of the world, members insist on abandoning the affairs of the country, to attend to their private affairs at home, although they have not worked out half the time they are paid for. And what do these agents do when in session? What is their roling idea? Is it the interests of their principles—the good of the country and the prosperity and happiness of the whole people. No intelligent man can live in Washington City, or even read the reports of Congress, without secing that the principal business of members while here is to enjoy themselves to the hest advantage and figure for a re-election. Instead of devoting their time and talents tation they cordially accepted.

Accordingly, on the morning of the 25th, at the Virst Baptist meeting house, Rev. the malmost entirely to their own interests; Mr. Adlam's, Rev. Dr. Jackson, paster of the Contral Baptist church, introduced his Excellency, Gov. Elisha Dyer, of Providence, serving their comployers they serve themselves; instead of doing all they confirm a feet the present of the providence who presided on that occasion. The Artil- can for the prosperity and happiness of the lery company, the Governor's escort, volun-people at large, they do all they can for tarily attended in their parade dress, with themselves and their particular friends: themselves and their particular friends; and instead of faithfully husbanding the mg a syum, given our of the Governor, in which the whole congregation united, and resources of the united they are constantly also the reading of the Scriptures by him, and an exceedingly appropriate prayer had been offered by Ites. Mr. Adiam, Governor This is no action, but what every in-Hyer made an admirable address to his ! telligent man in the country knows to be large andience and to the soldiery, and the case. This state of things wont do. It gave liberty to any one to participate in the services. These services were interspersed more than computers. Ealler, burnan namore than carpenters. Fallen human nafrom several elergymen and members of the | ture is the same in bath, and they will be suce to hurry the work and botch the job. The people must hold their agents to stricter arount. They must tell them what they want done, and see that they do it. and do tright. They must bear in mind that they, and not their Congressmen, are the principals, the governors, the legislators, and must not accordingly. In this country every man is a legislator, one equally with another, and the Primary Meetings of the Populain city, town, and hamlet, should be the Real Legislatures of the land, while Congress should only be considered a National Convention of Delegates to evivuss and record the will of the people, the real law of the land. they themselves were present at the drawing.
Another fact which the managers call attention to, is, that all persons have a legal right
to send orders for tickets to Maryland, as
lotteries are legalized by special law in that
state. A lottery is drawn every day in the
month. If no particular class is named, orders
are filled in the first drawing to take place
after the communication comes hand. The
prices of tickets vary from \$1,00 to \$20.—
No. tickets however, sent unless the monmoney for the same is received with the order.
The drawings are upon the principle of one
namber on each ticket (after the Harvan
ylan), and Ternary combination. Prizes vary
in annount from \$20 to 1020,000. All orders for
tickets or packages will receive prompt attention, and the drawing mailed to all purchasers immediately after it is over. Address
